RANGGA RADITYA NUGROHO

081217531945 | hello.ranggaraditya@gmail.com | www.linkedin.com/in/oecophylla/ | www.oecophylla.space
Surabaya, Indonesia

A results-oriented Fresh Graduate of Information Technology with a 3.91 GPA and a specialization in full-stack web development using the Laravel framework. Possesses a proven track record of designing, building, and deploying complex web applications, including information systems and registration portals with payment gateway integration. Experienced in enhancing system reliability — achieving a 50% downtime reduction in a previous project —and managing the end-to-end software development lifecycle. Ready to apply strong technical analysis and problem- solving skills to deliver efficient and impactful software solutions in a dynamic team environment.

Work Experiences

PT Xeno Persada Teknologi - **Surabaya, Indonesia** Nov 2025 - Present

Web Developer

- Ensured high system stability for the MyEnviro project by consistently meeting SLA targets, resolving critical issues within 24 hours, achieving a Zero Recurring Bug milestone through robust logical fixes, and delivering 100% documented Root Cause Analysis (RCA) for all medium to critical incidents to prevent future occurrences.
- Successfully delivered 8 out of 10 planned tasks on time for the ARHUB project, actively supporting development debugging, maintaining well-documented and clean code, providing consistent daily progress reports, and completing all assigned tasks with zero critical bugs
- Strengthened ARHUB deployment integrity by implementing rigorous self- reviews, verifying database migrations, and utilizing deployment checklists to ensure zero critical bugs and seamless post-launch stability

Flashcom Indonesia - **Surabaya, Indonesia** Nov 2025 - Jan 2026

Freelance Trainer

- As a Freelance Trainer at Flashcom Indonesia, responsible for teaching PHP and Laravel from beginner to intermediate levels. Designed curricula and practical materials (CRUD, routing, Eloquent, authentication, middleware, service container), facilitated hands- on workshops, guided participants through real projects, conducted competency evaluations, and provided mentoring and troubleshooting to improve programming skills and job readiness

Brilliant International Education Plus - **Pare, Kediri** Dec 2024 - Feb 2025

IT Support

- Led a complete overhaul of the student registration website, increasing system reliability and reducing downtime by 50%
- Identified, debugged, and resolved issues on the registration website, resulting in a 40% reduction in reported bugs and improving user experience
- Provided timely and effective technical support, resolving over 150 user requests per month to maintain high user satisfaction
- Implemented regular data backup schedules and enforced strict security policies to protect sensitive data for over 500 users

Brilliant English Course - **Pare, Kediri** Aug 2024 - Dec 2024

Junior Web Developer

- Engineered and launched a comprehensive member licensing system from the ground up, successfully managing over 2,000 individual license records
- Designed, developed, and deployed custom registration websites for 10+ affiliate partners, streamlining their user onboarding process
- Performed routine maintenance, feature updates, and support for over 10 company websites to ensure optimal performance and high availability
- Resolved over 50 critical bugs within the main registration portal, significantly improving system stability and user satisfaction

PT Adma Digital Solusi - **Surabaya, Indonesia** Feb 2024 - Jun 2024

Fullstack Web Developer

- Developed key modules for the "Medifirst" web application using the Laravel framework and Eloquent ORM for efficient database interaction
- Managed the deployment of application updates and bug fixes to a live Virtual Private Server (VPS) environment
- Actively collaborated with a development team to design, build, and test new features for the application

PT Hendevane Indonesia - **Jakarta, Indonesia** Aug 2023 - Dec 2023

Fullstack Web Developer

- Architected and built "RentDrive," a car rental information system, using Laravel for the backend and Bootstrap for a responsive frontend
- Successfully integrated the Midtrans payment gateway to enable seamless and secure online transactions
- Designed and implemented robust RESTful API endpoints, ensuring efficient and reliable communication between system components
- Utilized Postman for comprehensive API testing to guarantee functionality, performance, and security before deployment

Education Level

Politeknik Negeri Jember - **Jember, Indonesia** Aug 2021 - Aug 2025

Bachelor of Applied Computer Science, 3.91/4.00

- Recipient of the Student Creativity Program Grant (2023)
- National Finalist in the E-Government Competition (KMIPN IV 2022)
- Gold Medalist at the Indonesia International Applied Science Project Olympiad (2021)

SMK SENOPATI SEDATI - **Sidoarjo, Indonesia** Jul 2018 - Aug 2021

Vocational High School Diploma Software Engineering

- Top 5 Finalist in the Vocational School Student Competition for Web Technologies (LKS 2020)

Achievements & Certifications

- **Professional Certification** (2024): Junior Web Developer
- **Professional Certification** (2025): Web Developer
